Benjamin Zhuo

604-780-7966 | benjamin.zhuo@yahoo.com | linkedin.com/in/benjaminyzhuo | github.com/bnjmnzh

Technical Skills

Languages: Python, SQL, Java, JavaScript, HTML/CSS
Data Platforms & Warehousing: Apache Airflow, Snowflake, Databricks, SSMS (SQL Server), Pandas, NumPy
Frameworks & Observability: Spring Boot, Grafana, Prometheus, Dynatrace
DevOps & Infrastructure: Azure Kubernetes Service (AKS), Jenkins, Bamboo, Docker, Git, Grafana, Prometheus, Dynatrace

Experience

Ontario Teacher's Pension Plan June 2026 – Present
Data Engineer *Toronto, ON*

- Orchestrated complex enterprise batch and streaming pipelines using **Apache Airflow** to transform big data across **Snowflake** and **Databricks**.
- Managed data ingestion pipelines on **Databricks** to supply fresh, structured data for Retrieval-Augmented Generation (**RAG**) LLM applications.
- Automated CI/CD build and deployment pipelines using **Jenkins** and **Bamboo** to manage service container workloads on **Azure Kubernetes Service (AKS)**.

Ontario Teacher's Pension Plan March 2025 – June 2026
Software Developer *Toronto, ON*

- Designed backend microservices and workflow automations using **Spring Boot** and **Camunda**.
- Integrated system monitoring dashboards via **Grafana** and **Prometheus** to track service latency and error rates.

Ontario Teacher's Pension Plan June 2023 – March 2025
Associate Software Developer *Toronto, ON*

- Upgraded legacy web applications to **Java 17** and **Spring Boot 2.7**, improving system security and maintainability.
- Implemented automated testing frameworks to identify performance bottlenecks in core batch jobs.
- Diagnosed and resolved production incidents using **Dynatrace** and **Kibana**.

ThinkData Works Inc. September 2021 – August 2022
Data Science Co-Op *Toronto, ON*

- Built test-driven ingestion pipelines with **GitHub Actions** to harden the entity-resolution model pipeline.
- Developed web scrapers using **Python** (**BeautifulSoup**, **Selenium**) to extract and process datasets from external providers.
- Applied natural language processing (**NLP**) techniques for text pre-processing and classification tasks.

Projects

DialogFlow Chatbot | *DialogFlow, Node.js, Heroku* Summer 2020

- Collaborated with 5 peers to build an accessibility chatbot for OCASI using Google's NLP framework.
- Implemented a custom webhook fallback via **Node.js** to query the live OCASI database for unhandled user queries.

Pokemon Fusion Guesser | *React, JavaScript* December 2021

- Developed an interactive web-based trivia application built around API-driven image generation logic.
- Engineered responsive front-end components using **React** paired with clean state management.

Education

University of Toronto Toronto, ON
Bachelor of Science in Computer Science, Minor in Mathematics and Statistics *Sept. 2018 – June 2023*

- **cGPA**: 3.38/4.00 | **Honours**: Dean's List Scholar (2020, 2021) | Graduated with Distinction
